

# Nature Table - Winter Ideas

## Bulbs

Plant spring bulbs in pots in a sunny window. We have amaryllis and paper whites.

## Weeds

Find weeds in your yard or neighborhood that are brown and have seeds. Place them in a vase on paper. Observe the seeds that collect on the paper.

## Root Veggies

Suspend a carrot top in water by using toothpicks. Keep the water fresh and in time the carrot will sprout roots and leaves!

## Collection Tray

Make a collection of items found during your winter nature walks. Look for cones, lichen, galls, seeds, feathers, and rocks.
